

Wastewater

FLOCRESTORE™

FlocRestore™ is a biologically active product formulated from naturally occurring materials. **FlocRestore™** helps with removing and controlling filamentous bacteria.

Helps With:

- The reduction & control of filamentous bacteria
- The growth of heterotrophic floc forming bacteria

How It Works:

- Reduces the concentration of filamentous bacteria in an activated sludge plant
- Restores the floc forming ability of heterotrophic bacteria in activated sludge plants as it controls filamentous bacteria.
- Removes the need to chlorinate the activated sludge and is beneficial to the growth of heterotrophic floc forming bacteria

Benefits/Advantages

When **FlocRestore™** is introduced into an aerobic wastewater system it will reduce the proliferation of unwanted filamentous bacteria and restore the bacteria floc to a state dominated by heterotrophic floc forming bacteria.

HYDRO SOLUTIONS, INC exists to provide solutions to customers in the air and water treatment industries. We are dedicated to offering customized plans, products, and services to ensure our customers meet their air and water discharge permits while operating their systems at optimum efficiency.

For more information on effective management of activated sludge plants and other wastewater treatment solutions, visit hydrosolutions.com or contact our wastewater treatment specialists at 502-899-7107.
