

Condensate Growth Formula (CGF)

Technical Data Sheet

Condensate Growth Formula (CGF) is formulated in a balanced blend of energy rich co-substrates to a broad spectrum of B-Complex Vitamins, biological growth factors and co-factors. Helps with biological growth factors and co-factors.

Benefits:

CGF is a custom blend of co-substrates to meet specific metabolic and anabolic needs of a wastewater stream.

How It Works:

- Provides a blend of co-substrates to maintain the metabolic and anabolic needs of wastewater bacteria in a condensate waste stream.
- Provides a broad spectrum of B-Complex Vitamins, biological growth factors and co-factors to assist wastewater bacteria in a condensate waste stream.
- Can be adjusted to meet the specific metabolic and anabolic needs of wastewater bacteria in each individual condensate waste stream.

Physical Properties and Packaging:

- Liquid
- Tan—Brown
- 275 Gallon IBC Tote Bins (One-Way)

Safety and Handling:

Ensure product is stored above freezing temperatures (32°F). Handle according to safety instructions on MSDS sheet. Always wear gloves and eye protection when handling product.
