Wastewater

ESSENTIAL MICRO™ 2

Essential Micro™ 2 is a customized blend of essential metals and nutrients needed for healthy lagoons and wastewater systems.

Helps With:

- MicroNutrients
- Nitrification inhibition
- Trace metals
- Nutrient deficiencies

- Anaerobic treatment
- High volatile acids
- Filamentous bacteria reduction

How It Works:

- Designed to improve aerobic wastewater systems by promoting anabolic bacterial growth.
- Reduces toxicity & unwanted bacteria improving reliability and efficiency.
- Ideal for lagoons, aerations basins, and oxidation ditches where deficient trace elements appear as inhibition.
- **Essential Micro™ 2** is specifically formulated to each client's waste stream based on its essential trace elements profile.

Benefits/Advantages:

Essential Micro™ 2 is a compound of solubilized essential trace metallic elements intended to stimulate enzyme reactions to assist existing bacteria to reduce undesirable microorganisms and promote beneficial lagoon life.

HYDRO SOLUTIONS, INC exists to provide solutions to customers in the air and water treatment industries. We are dedicated to offering customized plans, products, and services to ensure our customers meet their air and water discharge permits while operating their systems at optimum efficiency.

For more information regarding trace elements essential to microbial life in lagoons and other wastewater treatment solutions, visit hydrosolutions.com or contact our wastewater treatment specialists at 502-899-7107.
