

Wastewater

NITRIFRESH™

NitriFresh™ is a high concentration of nitrifying bacteria.

Helps With:

- Bio Augmentation
- Loss of nitrification
- Nitrifiers
- Nitrification toxicity
- Nitrosomas/Nitrobacter
- Ammonium removal
- Cold water nitrification

How It Works:

- Nitrifying bacteria neutralizes ammonia.
- The addition of fresh, active and highly concentrated nitrifying bacteria cultures will assist in bringing about increased nitrification in the targeted wastewater treatment system.

Benefits/Advantages

NitriFresh™ is shipped overnight to ensure the freshness of the nitrifying bacterial cultures. This high concentration of nitrifying bacteria will increase the nitrifying bacteria population in the waste treatment biomass.

HYDRO SOLUTIONS, INC exists to provide solutions to customers in the air and water treatment industries. We are dedicated to offering customized plans, products, and services to ensure our customers meet their air and water discharge permits while operating their systems at optimum efficiency.

For more information regarding increased nitrification in targeted wastewater treatment systems and other wastewater treatment solutions, visit hydrosolutions.com or contact our wastewater treatment specialists at 502-899-7107.
