

Wastewater

POLYMER

Polymer wastewater treatment is a necessary element of both industrial and municipal water systems. We at HydroSolutions realize that the effects of chemicals on wastewater are a concern for many professionals in the industry, which is why our products are an effective solution for a greener environment. Our team has over 40 years of wastewater treatment experience and can provide valuable troubleshooting to maintain optimum operation of the wastewater treatment process.

Polymer Systems:

HydroSolutions, Inc. is a distributor for the world's largest manufacturer of synthetic polymers. We jar test to identify the most effective program to effectively and economically remove solids.

Protein Recovery:

Fat and oil recovery can be a major concern for the rendering business. Our line of products will meet clarity standards as well as work effectively within your centrifuge without polymerizin.

HYDRO SOLUTIONS, INC exists to provide solutions to customers in the air and water treatment industries. We are dedicated to offering customized plans, products, and services to ensure our customers meet their air and water discharge permits while operating their systems at optimum efficiency.
