

# FlocRestore™

## Technical Data Sheet

**FlocRestore™ is a biologically active product formulated from naturally occurring materials. Helps with removing and controlling filamentous bacteria.**

### **Benefits:**

When FlocRestore™ is introduced into an aerobic wastewater system it will reduce the proliferation of unwanted filamentous bacteria and restore the bacteria floc to a state dominated by heterotrophic floc forming bacteria.

### **How It Works:**

- Reduces the concentration of filamentous bacteria in an activated sludge plant.
- Restores the floc forming ability of heterotrophic bacteria in activated sludge plants; as it controls filamentous bacteria.
- Removes the need to chlorinate the activated sludge and is beneficial to the growth of heterotrophic floc forming bacteria.

### **Physical Properties and Packaging:**

- Dry Powder
- Tan to brown
- Provided in 2000lb super sacks or in 50lb bags

### **Safety and Handling:**

Avoid breathing dust. Store in a cool dry area where material will not get wet. Wet material makes application difficult. Keep out of sun; packaging is not UV protected. Handle according to safety instructions on MSDS sheet.
