

HydroCapture™

Technical Data Sheet

HydroCapture™ is a natural humic composition that reacts with hydrogen sulfide, sulfur dioxide, and most organic acids to neutralize the chemical and its odor. Also helps with lagoon odor, sulfide toxicity and aeration basin odor.

Benefits:

HydroCapture™ has a low PPM rate requirement, it is a cost-effective solution for odor and corrosion control as well as wastewater clarification.

How It Works:

- Provides a blend of co-substrates for the needs of the wastewater bacteria.
- Provides a broad spectrum of B-Complex Vitamins, biological growth factors and co-factors to assist wastewater bacteria in a condensate waste stream.
- It is formulated in a balanced blend of energy rich co-substrates to a broad spectrum of B-Complex Vitamins, biological growth factors and co-factors.
- Can be adjusted to meet the specific metabolic and anabolic needs of wastewater bacteria in each individual condensate waste stream.

Physical Properties and Packaging:

- Liquid
- Dark brown or black
- 275 Gallon IBC Tote Bins (One-Way)

Safety and Handling:

Ensure product is stored above freezing temperatures (32°F). Handle according to safety instructions on MSDS sheet. Always wear gloves and eye protection when handling product.
